OPERATIONS INTELLIGENCE

BUSINESS ANALYST PORTFOLIO PROTOTYPE

MIRA Group operations intelligence platform

A working Next.js prototype for property development oversight, commodities trading controls, CRM visibility, and CRM-to-SAP automation.

PREPARED BY

Alexey Efimik

Business Analyst candidate

Dubai-focused operations, data processing, dashboards, and system workflows.

TOTAL AUM

OPEN TRADES

12

↓ 2 pending docs

What this proves

Automated extraction from multiple sources, business logic transformation, dashboard-ready outputs, and a clear handoff model for developers.

Why it fits MIRA

The prototype keeps real estate as the group overview while giving MIRA General Trading a dedicated commodities risk desk.

Delivery style

Fast, static-first Next.js routes with cached API calls and a pre-rendered PDF export for HR-friendly sharing.

BUSINESS ANALYST USE CASE

- 1

Capture CRM deal
Commodity, volume, currency, counterparty, and target margin.
- 2

Fetch live signals
Commodity spot proxy, FX conversion, and logistics risk context.
- 3

Apply controls
Margin check, exposure threshold, documentation status, and hedging recommendation.
- 4

Prepare ERP payload
Clean JSON structure ready for SAP, Power BI, or downstream approval workflow.

Processing log
